

CAREER SUMMARY

Software engineer with a strong foundation in web development and a focus on creating impactful and user-centric solutions. With well over 3 years of experience in web development industry. I have honed my skills in technologies like Node.js, React, Vue and other Node base technologies. I hold a Bachelor's degree in IT and have actively contributed to open source.

WORK EXPERIENCE

Software Engineer - CodeFulcrum

August 2022 - October 2024

- Collaborated with teams of various sizes to deliver software solutions.
- Designed, developed and modified 20+ core software system components to enhance functionality and performance.
- Identified issues in the API and optimized it to improve the functionality of the system.
- Analyzed system flow, data usage, and work processes to identify and optimize critical areas, resulting in improved efficiency.
- Trained new team members on the details of software systems and best practices.
- Conduct regular code reviews to refine business logic, resulting in cleaner code and increased operational efficiency.
- Managed deliverables across multiple short-term sprints and long-term deployments to ensure timely project completion.

Web Developer - Devtrux

March 2021 - July 2022

- Assisted in gathering and analyzing requirements for various projects to meet client needs.
- Developed new features for various existing systems, focusing on functionality and user experience improvements.
- Collaborated closely with clients and project leads throughout the development lifecycle to ensure project success.
- Identified and resolved system bugs by conducting thorough analysis and implementing effective solutions.
- Contributed to the development of custom components tailored to specific project themes, enhancing overall system.

PROJECTS

Ditch The Label - NextJS

Contributed to the development of "Ditch the Label," a global youth charity website addressing mental health, bullying, and digital literacy using JavaScript, Next.js, Strapi, and NodeJS.

Math Starter - MERN

MathStarter.co.nz is a quiz app built using the MERN stack. I contributed to the development as a fullstack Node dev.

Colvert NPM Package - NodeJS

Built and published a NPM package used for color value conversions into other type of color values along with other helpful helper methods.

PassportOS by One Valley - VueJS • NodeJS

OneValley provides founders resources to grow their startup and software solutions for startup ecosystems and communities of all sizes. I contributed by optimizing the systems, integrating real-time data, and building a user-friendly interface.

SKILLS

Javascript, Typescript, Python, NodeJS, ReactJS, NextJS, VueJS, Web Components, Tailwind, MongoDB, Postgres, Strapi, Flask, Express, NestJS, Microservices, AWS, Webpack, Git, JIRA

EDUCATION

Bachelors of Information Technology • University of Education

2016 - 2020

Completed graduation in information technology with focus on Math, Cyber Security, Algorithms, Web and AI subjects.

CERTIFICATIONS

Master TypeScript - 2023 Edition • Udemy: Enhanced my TypeScript proficiency thorough lessons and practical exercises.

Skyscanner Front-End Development • Forage: Gained hands-on experience in building responsive and performant frontend.

NodeJS Dev Course • Udemy: Enhanced my NodeJS skills with comprehensive lessons and practical exercises.
